Investments in the Plan as of October 25, 2018

This section includes important information to help you compare the investments in the Plan and is comprised of two parts:

- **Part I** reflects performance information indicating how well the investments have performed in the past.
- **Part II** outlines the fees and expenses applicable to each investment. Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions. The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings.

Part I. Performance Information

Table 1 focuses on the performance of investments in the Plan that do not have a fixed or stated rate of return. This table shows how these alternatives have performed over time and allows you to compare them with an appropriate benchmark for the same time periods. Past performance does not guarantee how the investments will perform in the future. Your investment in these alternatives could lose money. Information about an investment's principal risks is available on the participant website at rps.troweprice.com.

All returns for periods greater than one year are annualized; all returns for periods less than one year are cumulative.

Investment returns and the comparable benchmark returns are generally calculated using performance information over the same period of time. However, in some instances, the period of time used for these calculations may vary slightly for an investment and the comparable benchmark where benchmark return data is not available on the investment's inception date.

The 1 yr., 5 yr. and 10 yr. investment Average Annual Total Returns and Benchmark Returns in Table 1 – Variable Return Investments will report a "-" when an investment inceptioned less than one year ago and, accordingly, return information is not applicable for the 1, 5 and 10-year periods. Benchmark returns will be reported as a "-" when the associated investment inceptioned prior to the inception date of the benchmark. Inception benchmark returns are typically only provided for a single broad-based securities market index benchmark ("broad-based benchmark").

Part II. Fee and Expense Information

Table 2 shows fee and expense information for the investments listed in Table 1. Table 2 shows the Total Annual Operating Expenses of the investments in Table 1. Total Annual Operating Expenses are expenses that reduce the rate of return of the investment. Table 2 also shows Shareholder-Type Fees. These fees are in addition to Total Annual Operating Expenses.

* This investment restricts a participant's exchange into an investment for a period of 30 calendar days after the participant has exchanged out of the same investment (the "30-Day Purchase Block"). Pre-authorized, systematic purchases and redemptions are exempt from the 30-Day Purchase Block. The initial exchange that occurs when adding automatic rebalance to your account is not considered a systematic transaction and is subject to the 30-Day Purchase Block; however, the subsequent automatic rebalances are considered systematic and are exempt from the 30-Day Purchase Block. In addition, the investment sponsor reserves the right to cancel or reject, without further notice, any exchange that is deemed to result in excessive or short-term trading.

In the Fees and Expenses table, the As of Date provided for non-T. Rowe Price ("non-TRP") investments is the most recent fiscal year end date for each investment as provided by a third party vendor. The Total Annual Operating Expenses for non-TRP investments may reflect the Total Annual Operating Expense for a period that is earlier than the As of Date. For T. Rowe Price investments, the As of Date for each investment is the fiscal year end date that corresponds with the Total Annual Operating Expenses reported.

The Total Annual Operating Expenses do not reflect any fee waivers and/or expense reimbursements that may be in effect.
